

Vinton 81 Soybean

Genetic Information

Vinton 81 is a group I variety (relative maturity 1.9) released from Iowa Agriculture and Home Economics Experiment Station. It is resistant to races 1 to 3 and 6 to 9 of phytophthora root rot. Vinton 81 was developed for its large seed and high protein. It has an average protein content of 44 to 45%. It is approved for use as a suitable variety for tofu production.

Agronomic Information

Vinton 81 is a large-seeded specialty soybean variety. It has purple flowers, grey pubescence, and tan pods. Seeds are dull yellow with yellow hila. It is described as having up to 1% other hila. Vinton 81 is a taller variety and has shown good resistance to flooding. Special attention should be taken when planting to compensate for its large seed.

Marketing Information

Vinton 81 is available as a public variety from producers in Michigan. Seed of this variety can only be sold by variety name as a class of Certified seed. Authorized seed classes will be Breeder, Foundation, and Certified.
